The T@W project is funded under the European Commission, Sixth Framework Programme (FP6) to **enhance penetration of the European sustainable energy technology (SET) and know-how on emerging EU ETS and CDM markets.**

To this end, T@W is organising **Facilitation workshops** to:

- **Initiate specific SET/CDM project development in Asia** in line with the technology needs and technology transfer aspects.
- **Facilitating business cooperation** between local market actors and EU companies.

Participants in the workshops will include:

- Project owners and developers in Asia
- National and Technical Committees on CDM for Energy Sector
- Asian Ministries and the European Commission
- European and Asian suppliers of technologies and services
- Financial Institutions
- CDM Consultants
- Asian and European Industry Associations

## Business-to-Business (B2B) Meetings

During the Facilitation Workshops, business-to-business meetings will be arranged offering you an opportunity to meet with other organisations, which will be in the interests of both parties.

If you offer sustainable energy technologies or project development services, and want to find project owners, or ...

... you are involved in a project and are seeking project development assistance or technology suppliers, then ...

... please complete the Partner Matching Form:

[www.setatwork.eu/downloads/PM\\_Form\\_080102.doc](http://www.setatwork.eu/downloads/PM_Form_080102.doc) (50 Kb)

If you are unable to attend these facilitation workshops, you are still welcome to complete a partner matching form, which will be disseminated during the workshops. You will also have the opportunity to meet contacts at a follow-up event in Copenhagen in March 2008.

## Technology Focus

China	India	Thailand	Malaysia
Biomass gasification Biomass combustion CHP in paper or other mill Landfill recovery power generation Offshore wind turbines	Wind Biomass Small hydro Solar Waste	Biomass Biogas Biofuels Waste	Biomass Biogas Solar Thermal Photovoltaics Small hydro Energy efficiency improvement Waste Transport Landfill
